ABSTRACT

This compilation of programs for training physician support personnel, as of March 1, 1971, includes 125 programs in 35 states. Of these, 47 extend nursing roles and 78 accept students with varied qualifications. At least 60 programs are presently operational, with about 1,000 students in training and an equal number of graduates. The programs in the compilation are categorized as follows: Programs with Varied Entrance Requirements; Programs for Extending Nursing Roles; and Planned or Operational Programs Not Summarized in Detail. It is suggested that those who use this compilation for student counseling or for selecting a training opportunity should check the status of the individual training program. (DB)

The Division of Manpower Intelligence, established in the Bureau of Health Manpower Education in 1970 to provide a focus for the development, interpretation, coordination, and evaluation of health manpower education information, publishes five report series, as follows:

- * HEALTH MANPOWER DATA SERIES Reports of survey findings and compilations of data on health manpower educational institutions and training programs and related manpower data.
- * ANALYTICAL STUDIES SERIES Monographs and other problem-oriented studies dealing with health manpower education, supply, and requirements.
- * RESEARCH AND DEVELOPMENT SERIES Technical papers concerned with the development of improved analytic methods and techniques, for use in studies of health manpower education.
- * BHME PROGRAM SERIES Listings, statistics, and analyses of Bureau of Health Manpower Education grants and loan programs, other BHME operations, and related programs.
- * NATIONAL CLEARINGHOUSE FOR HEALTH MANPOWER INFORMATION SERIES Recurring and special publications designed to improve utilization of health manpower information.

SELECTED TRAINING PROGRAMS FOR PHYSICIAN SUPPORT PERSONNEL

June 1970 Revised March 1971

ACKNOWLEDGMENTS

The cooperation of the American Academy of Pediatrics and the various program directors in making available the information is gratefully acknowledged.

Introduction

Programs for training physician support personnel have greatly proliferated in the past year. The original compilation of such programs in June 1970 identified 67 programs, 39 of which were described in detail. Of these 39, 17 required a background in nursing as a prerequisite.

As of March 1, 1971, the cut-off date for the inclusion of new materials in this compilation, 125 programs in 35 states have been identified as meeting the criteria for inclusion. Of these, 47 extend nursing roles and 78 accept students with varied qualifications. At least 60 programs are presently operational, with about 1,000 students in training and an equal number of graduates.

The programs included here are those which we have been able to identify as of March 1971. An exhaustive survey of such programs is currently underway, and the information collected will be included in a future edition of this publication. The Professional Requirements Branch would appreciate your help in identifying additional programs which should be included.

No endorsement or assurance of quality is inferred by the inclusion of programs in the compilation, and accreditation status is not given. Criteria for inclusion of a program in this compilation are:

- 1. The program is operational, in pilot testing stage, or in advanced planning, with assurance of financial support and operation within a year.
- 2. As of March 1971, accreditation standards do not exist, are being developed, or have only recently became developed.
- 3. For admission, students must have completed high school or its equivalent and the program provides either:
- a. Short- or long-term training to expand the capabilities of persons with previous health service training and experience, or
- b. Long-term training for persons with no previous formal health service training or experience.
- 4. The resultant health professional would have identification differentiated from traditional health professions as they currently exist, and would work under the direction of a physician or provisions to perform tasks the physician would have to perform in the absence of this specially-trained individual.

Accreditation and Guidelines for Developing Programs

Programs for orthopedic assistants continue to be included in the compilation, constituting an example of programs for which accreditation

procedures have recently been developed. The American Academy of Orthopedic Surgeons, working with the appropriate organizations, has submitted materials justifying the development of orthopedic assistants as a new category of allied health professional. This justification has been approved by the American Medical Association (AMA) Council on Health Manpower, and essentials for training have been developed by the AMA Council on Medical Education. The training programs in San Francisco and Iowa for orthopedic assistants are prototype programs meeting the established requirements. Candidates for training interested in the accreditation status of orthopedic assistant programs should check with the program directors or with the AMA Department of Medical Education.

At the present time, the American Urological Association is working actively with the AMA to establish the mechanisms for accrediting urologic assistant training programs.

The American Academy of Pediatrics and the American Nurses Association have developed and issued joint guidelines for Pediatric Nurse Associate training programs. Similar negotiations are being carried out between the American Academy of Pediatrics and the American Association of Medical Assistants with regard to training programs for pediatric assistants. These efforts are being coordinated with the AMA. Persons interested in training in these categories may seek information about the status of a given training program from the program director and American Academy of Pediatrics.

The American Society of Internal Medicine, American Academy of Pediatrics, American Academy of Family Physicians, and American College of Physicians are currently working with the AMA to develop guidelines for assistants to primary care physicians. As of March 1, 1971, however, the details have not been completely developed.

Other organizations which have published statements defining types of physician's assistants include the National Academy of Sciences, the Association of American Medical Colleges, and the American Hospital Association. The guidelines developed by the AMA Council on Health Manpower for the development of new health occupations were published in the August 17, 1970 issue of the Journal of the American Medical Association, and copies are available from the AMA.

For Counsellors and Prospective Students

In view of the rapid developments in this field, persons using information contained in this compilation for student counselling or for the selection of training opportunity should carefully check the status of training standards for the particular category as well as the status of the individual training program. Prospective students are also advised to be fully aware of the legal status of the particular category in their State. To date, at least 6 states have passed legislation enabling physicians to delegate tasks to physician's assistants and other similar personnel (Arizona, Colorado, Kansas, Oklahoma, California, and Florida), and at least 12 others are known to be considering such legislation.

University of Alabama

Beulah M. Hathaway, M.D. Chief, Anatomic Pathology

Birmingham Veteran's Administration Hospital

700 19th Street South Birmingham, Alabama 35233

PROGRAM TITLE:

Pathology Assistant

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The one-year course of study consists of a program of both didactic lectures and a clinical experience. Courses include anatomy, biology, chemistry, medical terminology, photography, histology, and cytology. There are plans to expand the program to two years in the near future, to enable students to receive a

B.S. degree.

DEGREE OR CERTIFICATE AWARDED:

Certificate

ENTRANCE REQUIREMENTS:

Two years of college or the equivalent are

preferred.

NUMBER OF STUDENTS

ENROLLED:

3 (There are plans to expand to 10)

PROGRAM DIRECTOR:

William Harlan, M.D.

Associate Dean, Division of Family Practice and Ambulatory Medicine

PROGRAM TITLE:

Physician's Assistant

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The 24-month program is divided into 2 parts-didactic and clinical. The didactic portion consists of three phases: Introductory Phase (5 weeks)- courses include history, philosophy ethics of medicine, medical terminology, chemistry, medical microbiology, laboratory medicine, animal experimentation and surgery, and data processing; Core Phase (22 weeks)-anatomy, physiology, biochemistry, pharmacology, behavioral sciences; Final Phase (6 weeks)-patient evaluation and diagnosis, electrocardiography, growth and development, radiology, and dentistry.

The 9 month didactic period is followed by 11 months of required clinical rotations in medical outpatient, general surgery, obstetrics and gynecology, and pediatrics, and 4 months of elective rotations in cariology, endocrinology, gastroenterology, nephrology, neurology, rheumatology, dermatology, orthopedics urology, and radiology.

DEGREE OR CERTIFICATE AWARDED:

Certificate

ENTRANCE REQUIREMENTS:

Students with 2 years of college, primarily in the biological sciences, are preferred; students should have previous experience in the health field, with at least one year involving extensive direct patient care.

Mrs. Eloise Hansen

PROGRAM TITLE:

Pediatric Assisting

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The two-year program is an option of the two-year Medical Assisting Curriculum offered at De Anza College. Pediatric Assisting majors will have courses emphasizing pediatrics. Medical Assisting courses include anatomy and physiology, effective communications, medical terminology, microbiology, first aid, clinical techniques, office management, general psychology, and a number of others. The pediatric portion consists of courses in common childhood diseases and prevention, pediatric test methods and procedures, immunology and microbiology, and externship. At the present, a summer session is required of students in the program in addition to the usual 2-year Medical Assisting program.

DEGREE OR CERTIFICATE
AWARDED:

A.A. Degree (Associate of Arts)

ENTRANCE REQUIREMENTS:

Completion of the Medical Assisting Curriculum and staff recommendation. Applicants to the Medical Assisting Program must meet the regular requirements for entry into De Anza College.

NUMBER OF STUDENTS ENROLLED:

Anticipate 10-15 per year

NUMBER OF STUDENTS GRADUATED:

City College of San Francisco

50 Phelan Avenue

San Francisco, California 94102

PROGRAM DIRECTORS:

Mr. Jules Fraden
Dean of Instruction

F. Richard Schneider, M.D.

Clinical Director

PROGRAM TITLE:

Orthopaedic Assistant

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The program of instruction covers a period of two years and consists of four 15-week semesters. The curriculum includes courses in the fallowing core areas: (1) health service (275 hours), (2) orthopaedic assisting, (850 hours) and (3) general education (375 hours). Included are instruction in patient care and staff relationships, anatomy and physiology, emergency room techniques, cast and traction application, office procedure and care of supplies and equipment, orientation to physical therapy, orientation to prosthetics and orthotics, and operating room techniques.

The two-year course will also include practical experience as orthopaedic assistants in 8 affiliated hospitals and in orthopaedic surgeons' offices.

DEGREE OR CERTIFICATE AWARDED:

A.A. degree. Certification will initially be carried out by the accredited Orthopaedic Assisting program until certification guidelines will be developed by a Board of Orthopaedic Assistants.

ENTRANCE REQUIREMENTS:

Preferably a high school education or its equivalent. Adults with a 10th or 11th grade reading level and medical corpsmen will also be considered.

NUMBER OF STUDENTS ENROLLED:

1969 25 Students Enrolled 1970 25 Students Ernolled

NUMBER OF STUDENTS GRADUATED:

University of Colorado School of Medicine 4200 East Ninth Avenue Denver, Colorado 80220

PROGRAM DIRECTORS:

Henry K. Silver, M.D. Chairman, Department of Pediatrics

James A. Hecker, M.D.

John E. Ott, M.D.

PROGRAM TITLE:

Child Health Associate Program

STAGE OF DEVELOPMENT:

Operational

CURRI CULUM:

Child Health Associates will complete two (or more) years of work in an undergraduate college or university before entering the program; this would be followed by a twoyear course of instruction at the University of Colorado Medical Center in Denver and a one-year internship. As undergraduates, students will take a course similar to that taken by premedical students. The curriculum for the first of the two years at the medical center would consist principally of study in the basic sciences, while the second year would be primarily a clinical experience on the pediatric wards, in the nurseries, in the outpatient department, as well as in various community facilities. The clinical year would be followed by an internship of 12 months.

The student would be able to care for almost all the problems of well children as well as most of those with mild disease states (80% of the children seen in a medical practice fall in these categories). Within established limits, the associate would be qualified in diagnose, counsel, and prescribe in both health and sickness.

DEGREE OR CERTIFICATE AWARDED:

B.A. degree from the University of Colorado. Certification by the Colorado State Board of Medical Examiners. University of Colorado School of Medicine

ENTRANCE REQUIREMENTS:

Completion of 60 semester hours or 90 quarter hours in an accredited college or university. Candidates must have successfully completed 8 semester hours each of general chemistry, psychology and biology, and a one-year course in English Literature. In special circumstances, substitutes for the above requirements may be made.

NUMBER OF STUDENTS ENROLLED:

23

NUMBER OF STUDENTS GRADUATED:

Washington Hospital Center 110 Irving Street, N.W. Washington, D.C. 20010

PROGRAM DIRECTORS:

James M. Bacos, M.L. Chief of Cardiology

PROGRAM TITLE:

Cardiovascular Technician Training 🕾 ogram

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The 18-week program concentrates on giving background and climical experience in the cardiovascular field. With the training, the trainee should be sufficiently well versed to be able to step into one of several roles in the cardiovascular field, working under the supervision of a knowledgeable physician. He will complement the work of the nurses, work parallel to them, and relieve them of some of their non-nursing tasks.

The course is divided into two phases: Phase I consists of five weeks of formal lectures, laboratories, and demonstrations, with ample time for informal discussions with the instructors. Phase 2 consists of rotations through various clinical areas, arranged to give opportunity for practical application of the didactic material. During this phase, four days per week are spent in the clinical areas and lectures are continued on the remaining day.

STAGE F PEVELOPMENT:

Operational

CURRICE:

The two year Program is designed to train experts in the practical and technical aspects of patient care in the areas of Medical Intensive, Coronary, Respiratory, and Emergency Care. The first nine months consist entirely of didactic courses in Anatomy and Physiology, chemistry, medical terminology, medical physics, pharmacology, drug math, introduction to the study of disease, ICU techniques, and laboratory techniques. During the remaining fifteen months, students receive clinical experience in Coronary, Respiratory, and Medical Intensive Care Units and Emergency Clinics to supplement classroom lecture on cardiovascular disease, medical electronics, cardiovascular instrumentation, cardiac auscultation, cardiac dysrhythmias, cardiovascular history and physical, respiratory disease, pulmonary function testing, history and physical, respiratory therapy, management of medical emergencies and management of surgical emergencies.

DEGREE OR CERTIFICATE
AWARDED:

Certification as a Medical Specialty Assistant from Grady Memorial Hospital.

ENTRANCE REQUIREMENTS:

1. High school graduate.

- 2. At least two years as a corpsman in the armed service or similar experience in the health field.
- 3. Scholastic Aptitude Test scores.
- 4. Completed application, three personal references, and high school and any college transcripts.

PROGRAM DIRECTOR:

John Verby, M.D.

PROGRAM TITLE:

Physician's Associate

STAGE OF DEVELOPMENT:

Planning

CURRICULUM:

This is a scholarship program thereby third year medical students will be produced an opportunity to associate themselves with selected physicians or groups of physicians in non-metropolitan areas in the state. The students will associate themselves intimately with the preceptors, participating in all aspects of patient care in home, office, and hospital. Two quarters of credit will be given for this work. Students may elect to remain in the physician's associate status for a period of up to five years before returning to the medical school.

DEGREE OR CERTIFICATE AWARDED:

Two quarters of credit will be earned, to be

applied to the medical degree.

ENTRANCE REQUIREMENTS:

Students will be selected from the incoming class of the medical school on the basis of application and other indications of genuine desire to eventually practice in a small community. Students in their second year may also be selected.

PROGRAM TITLE:

Physician Assistant Training Program

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The curriculum is provided in a basic training program and in an advanced training program. The objectives are to provide the student with the necessary background for screening patients, the methodology for initiating appropriate differential diagnostic procedures, the appreciation for compliance with guidelines regarding the scope of participation, and to provide him with cross-training in laboratory, radiology, pharmacy, nursing, physicial therapy, surgical assistance, dental assistance, safety and sanitation. Training is provided for state and local prisons and non-prison systems when space is available. The basic training program includes two quarters of lectures (374 hours) and on-thejob training (346 hours). The advanced training program includes review, on-the-job training, and observation.

DEGREE OR CERTIFICATE AWARDED:

A certificate is granted from the Bureau of Prisons.

ENTRANCE REQUIREMENTS:

- 1. Experience in the health field at the level attained by military corpsman;
- 2. High school diploma or equivalent;
- 3. Final acceptance requires a security clearance.

NUMBER OF STUDENTS ENROLLED:

8 men enrolled.

NUMBER OF STUDENTS GRADUATED:

4 graduates; 2 assistants from state prisons have trained for one quarter.

INSTITUTION:

Brooklyn-Cumberland Medical Center and Long Island University, Brooklyn Campus 121 DeKald Avenue Brooklyn, New York 11201

PROGRAM DIRECTOR:

Arnold Lewis, M.D.

PROGRAM TITLE:

Medical Services Associate Program

STAGE OF DEVELOPMENT:

Presently a pilot project with "seed" money for the training of classes of 24 students for the next three years. The first class of 24 students started on February 2, 1970.

CURRICULUM:

Medical services associates will train for two years, year round, to prepare them to assist physicians in general practice, and in the areas of general internal medicine and surgery. The program will include didactic courses in the basic concepts of human anatomy, physiology, pathology, pharmacology, English. mathematics, sociology, psychology, medical ethics, and medical terminology. Each participant will be exposed to approximately one added year of clinical experience working in the medical care areas of the Brooklyn-Cumberland Medical Center. They will be taught to take routine parts of medical histories, perform physical examinations, participate in and assist with procedures performed by the physician, assist at operations, review the patients' charts for routine procedures and spot-check developments in the course of the disease process in each individual patient.

DEGREE OR CERTIFICATE AWARDED:

The first students will be granted a joint Brooklyn-Cumberland Medical Center/Long Island University certificate. Degree granting programs at both the A.A.S. and B.S. levels are planned.

ENTRANCE REQUIREMENTS:

Candidates are recruited predominantly from the Fort Greene/Bedford-Stuyvesant area of Brooklyn. Both recently discharged medical corpsman and high school graduates or the equivalent will be selected from those expressing a desire to enter the health field and who have exhibited academic and personal qualities indicating motivation and

capacity for success. Although academic achievement tests will be given, primary emphasis will be given to a personal interview with evidence of motivation and psychological adaptability stressed.

NUMBER OF STUDENTS ENROLLED:

24 students will be enrolled for each of the first three classes.

PROGRAM TITLE:

Physician's Assistant

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The educational curriculum covers a period of 24 months. The preclinical portion covers an academic period of 36 weeks and is divided into three phases rather than two semesters. The first and third phases are each six weeks in duration and the second phase, twenty-four weeks. The first phase includes courses in the history, philosophy, and ethics of medicine, basic clinical laboratory, Medical terminology, chemistry, animal experimentation, and community health. The second phase includes microbiology, anatomy, physiology, biology, pharmacology, physical evaluation, diagnostic procedures, animal surgery, and clinical psychiatry. The third phase includes electrocardiology, radiology, data processing and patient evaluation.

The clinical curriculum of fifteen months consists of nine months of required rotations, and six months of elective rotations. It is during this aspect of the training program that the student is expected to develop expertise in the application of his preclinical learning. Areas covered are general medicine, pediatrics, surgery, internal medicine, allergy and respiratory disease, cardiology, dermatology, endocrinology, gastroenterology, hemotology, hyperbaric medicine, industrial medicine, nephrology, neurology, radiology, neurosurgery, ophthalmology, orthopaedic surgery, otolarynology, plastic surgery, and urology.

Urologic Physician's Assistant

Operational

The first nine months of this 2-year program are devoted primarily to didactic instruction. During three 12-week quarters, students take the following clinically-oriented courses: biochemistry, anatomy, physiology, microbiology, pathology, pharmacology, patient evaluation and diagnosis, urological evaluation and diagnosis, urology, and the history and ethics of medicine.

The last 15 months are devoted to clinical instruction in urology and closely related fields. Students spend time in the endoscopic suite, the urologic in-patient and out-patient services, and surgery, and may elect rotations on certain related services or in a private urologic practice per arrangement with the director.

Urologic Physician's Assistant Certificate

- 1. A high school diploma
- 2. At least 3 years of medical experience or 2 years of college
- 3. Submission of scores on the Scholastic Aptitude Tost
- 4. Submission of all academic records at the high school level and beyond
- 5. Two letters of recommendation from medical supervisors or academic instructors

Exceptions may be made in unusual cases.

PROGRAM TITLE:

Graduate Psychiatric Art Therapists

STAGE OF DEVELOPMENT:

This program is in its fourth year.

CURRICULUM:

This program consists of 2 parts. The first is an 11 month internship, which is based on a 40 hour week, and two 5 1/2 month clinical rotations. The week is divided into approximately 15 hours in didactic lectures, 18 hours clinical experience, 1 hour individual supervision with a psychiatrist on the staff, 1 hour individual supervision with an art therapist on the staff, and I hour a week small group supervision. The material covered in the courses is normal and abnormal psychology, psycho-analytic theory, art theropy theory, group dynamics, and an overview of other psychiatric theories. clinical rotation provides supervised experience with emotionally disturbed and brain-damaged children for 5 1/2 months, and 5 1/2 months with adolescent and adult mental patients in partial and full-time hospital settings.

DEGREE OR CERTIFICATE AWARDED:

At the end of the 11 month internship, the students receive a certificate from the Department of Mental Health Sciences stating that they have fulfilled all the requirements satisfactorily for this period. They then have the option to take a qualifying exam (comparable to graduate comprehensive examination) and, if they pass, may enroll in the graduate school and proceed to write their theses for an M.S. Degree in Mental Health awarded by the Medical College. The M.S. Degree was accredited in 1969. To date, 27 students took the qualifying exam and passed it, 16 are currently working on their M.S. thesis.

ENTRANCE REQUIREMENTS:

- The student must be a graduate of an accredited college with a Bachelor of Fine Arts, Bachelor in Art Education, or its equivalent.
- Completion of an application form.
- 3. Three character and personal evaluation forms.
- College transcripts.
- 5. Scores from the Miller Analogies Tests.

NUMBER OF STUDENTS ENROLLED:

1st class, 6 students - September 1967
2nd class, 9 students - September 1968
3rd class, 20 students - September 1969
4th class, 20 students - September 1970
5th class, 20 students - September 1971
20 students is the maximum number they plan
to accept in future years.

NUMBER OF STUDENTS GRADUATED:

Of the 35 students enrolled in the first three years, 2 dropped out of the program 33 received their certificates, 29 are currently employed as art therapists, and 3 students are expected to receive their Masters Degree in 1971.

PROGRAM TITLE:

Mental Health Technology

STAGE OF DEVELOPMENT:

Fully operational

CURRICULUM:

Two-year program. The junior year is comprised of didactic seminar-type courses exclusively. The students are taught developmental psychology, psychopathology, group and family process and the role of culture in mental illness and mental health. They also become acquainted with the structures and functions of mental health organizations with strong emphasis on community mental health centers. The senior year requires 40 hours weekly for an 11-month period of a supervised clinical training experience. The focus of the training is the acquisition of skills in a specialty of the student's choice. Included in the 40-hour week of the senior year are 5 ongoing seminars covering activities and subject areas related to the concomitant field training. Readings and discussions flowing from these seminars are intended to broaden further the student's knowledge in the bahavorial sciences, family theory, social and

community resources and the use of drugs.

DEGREE OR CERTIFICATE AWARDED:

Bachelor of Science Degree

ENTRANCE REQUIREMENTS:

- 1. Minimum of 60 hours (semester) of college credit.
- 2. Completion of application.
- Character references and personal interview. 3.
- College transcripts.

PROGRAM TITLE:

Clinical Associate

(with subtitles indicating more specific areas of training, for example: Clinical Associate

in Pediatrics).

STAGE OF DEVELOPMENT:

Operational with respect to the "core"

curriculum.

CURRICULUM:

The duration of the training program is four years except when transfer of credit and waiver by examination is acceptable. A "core curriculum" common to several Allied Health Professions has been established. The student is given a choice of allied health fields upon completion of certain liberal arts and medically oriented basic science courses for which full academic credit is given. The student is trained to assist the physician in the basic aspects of medical care: (1) To interview, (2) To examine, (3) To test, (4) To treat, (5) And to maintain continuity of communication and observation in its most broad sense. Purely technical skills are subservient, and vary with the field of special interest and endeavor.

DEGREE OR CERTIFICATE AWARDED:

A Bachelor of Science Degree upon satisfactory completion of both "core" and clinical training.

ENTRANCE REQUIREMENTS:

An excellent high school record, transferable credits, waiver by examination for credit for previous experience that is related to required courses, and an aptitude for ethical and compatible human relationships.

6

STAGE OF DEVELOPMENT:

Operational /

CURRICULUM:

The curriculum covers a period of 4 years and consists of training in liberal studies, (includes English, speech, and social sciences) medical science, and clinical rotations. Required courses total 125 to 129 semester hours. Students are encouraged to enroll in elective courses to enrich their total educational experience.

The clinical experience begins in the third quarter of the first year. It accelerates with each quarter through the tenth. From the eleventh through the fourteenth, it is a full-time clinical clerkship off campus. The last quarter is 1/3 liberal studies, 1/3 clinical clerkship, and 1/3 senior seminar.

Required clincial rotations are medicine, surgery, intensive care, outpatient clinic, and doctor's office. Electives can be in pediatrics, urology, orthopedics, ear, nose, and throat, clinical research, obstetrics, psyshiatry, community health and preventive medicine.

DEGREE OR CERTIFICATE AWARDED:

B.S. in Medical Science

ENTRANCE REQUIREMENTS:

High school diploma, demonstration of good scholarship, high character, and strong motivation; satisfactory test data on S.A.T. or A.C.T., at least 10 units in college preparatory subjects.

NUMBER OF STUDENTS ENROLLED:

95

NUMBER OF STUDENTS GRADUATED:

Marshfield Clinic

Marshfield, Wisconsin 54449

PROGRAM DIRECTOR:

Francis N. Lohrenz, M.D.

Chairman, Physician Assistant Committee

PROGRAM TITLE:

The Physician Assistant:

Oncology (study of tumors)

Gastroenterology

Pediatric Ophthalmologic Neurosurgical

General Practitioner

Orthopedic

STAGE OF DEVELOPMENT:

Developmental

CURRICULUM:

Oncology--Learns the administration and calculation of intravenous doses and evaluation of toxicity of chemotherapeutic drugs in order to care for and supervise courses of specific chemotherapeutic drugs as directed by the physician, and to check patient who are seen frequently during course of chemotherapy; discharge summaries.

Gastroenterology--Learns how to inject BSP dye, perform secretin tests and esophagoscopies, and small bowel biopsies, in order to be able to perform all of these procedures at the direction of the physician.

Pediatric--Learns to perform physical examinations of newborn, to instruct mothers who breast feed babies, their adjustment to feedings, and early postnatal care. Projected duties include house-call visits three weeks after discharge.

Ophthalmologic--Learns about refraction, visual fields, tests for glaucoma, and how to assist with cataract surgery in order to be able to perform refractions, visual field evaluations, tonometry, and to act as assistant during cataract surgery.

Neurosurgical--Scrubs with neurosurgeon, prepares patients for diagnostic procedures, helps with spinal taps, does discharge summaries, makes rounds.

General Surgical--First assistant in surgery, 4-6 hours a day, dressings, makes rounds, attends conferences.

Orthopedic--Puts on casts, screens patients for the orthopedic surgeons, does discharge summaries, scrubs and acts as assistant during orthopedic surgery.

In general, these programs involve about three months of on-the-job training before the trainee becomes fully functional. At the conclusion of the training period, the trainees are retained by the clinic as members of the staff.

DEGREE OR CERTIFICATE AWARDED:

None

ENTRANCE REQUIREMENTS:

Students with some sort of medical training are preferred. These include former medical corpsman, registered nurses, and those with experience in health research laboratories.

NUMBER OF STUDENTS ENROLLED:

One in each of the courses.

PROGRAM TITLE:

Family Health Practitioner

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The object of this program is not to train nurse technicians, but to present a well-rounded educational program, providing the public health nurse with sufficient knowledge and skills so that she is capable of using sound judgment, does not need constant supervision and can, therefore, assume a more independent role. During the first 12 months of the program, students will receive background knowledge and skills in committee cine, physical diagnosis, and clinical magament of all age groups through lectures, seeing, clinical demonstration, and supervised clinical practice in primary care settings. The final six months of the program will be a rotating clinical field experience in appropriate primary care units selected in accordance with their readiness to utilize the nurse practitioner and to provide a meaningful experience for the student.

DEGREE OR CERTIFICATE AWARDED:

MPH degree

58.

University of California School of Public Health, Earl Warren Hall

ENTRANCE REQUIREMENTS:

Applicant must be a qualified public health nurse with a baccalaureate degree and a minimum of two years experience in the area of community health. The nature of the experience should be such that it provides the opportunity to apply public health nursing skills, assume responsibility, and take independent action. References from employers must show evidence the nurse has demonstrated certain abilities and is secure and innovative, comfortable with responsibility, capable of independent decision making, has an inquiring mind and interest in clinical medicine, and is committed to giving high quality care. Academic qualifications should relfect a minumum grade point average Special attention is given to previous academic performance in clinical and biological sciences.

Medical Consultants: Department of Pediatrics Richard L. Tompkins, M.D. Naomi K. Pitman, M.D.

PROGRAM TITLE:

Pediatric Nurse Associate

STAGE OF DEVELOPMENT:

The project proposal is being written. The first level of instruction started Fall 1970. (Second and third parts of sequence will be offered after the project proposal has been approved and the program reviewed by pediatric and nursing practice organizations.)

CURRICULUM:

This program will encompass nine units. The initial course is three units and involves laboratory practice as well as theory. Arrangements have been made with the neighboring health departments for nurses on their staff to obtain the laboratory practice in the on-the-job child health conferences. The purpose is twofold: To prepare nurses for the specific role of Pediatric Nurse Associate within an ambulatory care setting; and, secondly, to foster better utilization of nurses in the delivery of health services in the community. Instruction is to build competence in the physical and developmental assessment of the child, including his history and recording, counseling of mothers and teaching of parents, management of minor illnesses and follow-up of the children in the home and community.

Loma Linda University Pediatric Nurse Associate

CURRICULUM (cont'd.):

Students are assisted with role reorientation, the process of collaborating and in increasing decision-making competence. Affects of culture, poverty and environmental factors are incorporated.

DEGREE OR CERTIFICATE AWARDED:

Certificate at completion of nine units.

ENTRANCE REQUIREMENTS:

Students may take first level in the senior year of the baccalaureate program in nursing.

Nurses with a baccalaureate degree, including preparation in Public Health Nursing, may register for the course. They must have a license to practice in the state of California.

References and personal interview determine the students' personal qualifications.

STAGE OF DEVELOPMENT:

No longer operational

CURRI CULLUM:

The program is constructed to prepare nurse to function as a vital cog in child health care team, in close working relationship with and under the supervision of the pediatrician. The length of the program is 12 months.

- 1. Basic and clinical pediatric science: 4 months. Didactic lectures and seminars in the basic sciences, as they relate to child health, in normal growth and development, common childhood illnesses and problems, mental health and parental-child relationships. Intensive instruction in historytaking and physical science material.
- 2. Clinical perience: 8 months. Will include participation in daily activity of physiciam teams in normal neonatal unit (1 month), regular ward-service (1 month), acute care clinic (3 months), and specialty clinics (3 months), emphasizing here well-child care, cardiology, neurology and learning disorders, dermatology. Will also utilize community clinical resources, such as public health well-child clinics and group practice settings.

DEGREE OR CERTIFICATE AWARDED:

Certificate stating that nurses have completed the 12 month program in satisfactory fashion.

PROGRAM DIRECTOR:

Elda R. Popiel, R.N. Professor, School of Nursing

PROGRAM TITLE:

Pediatric Nurse Practitioner

STAGE OF DEVELOPMENT:

Fully Operational

CURRICULUM:

The intensive Sixteen-week Pediatric Nurse Practitioner Program provides an opportunity for nurses to expand their role in providing health care for children. The focus of study is the well child in the family, school, and community settings. Academic and clinical study areas include University of Colorado Medical Center and selected health care facilities in the community of Denver. The course titles of the areas of study are as follows:

- 1. Evaluation of Child Health (8 weeks) -Emphasis is on developing the nurse's skills
 in taking the health history, performing
 physicial examples analyzing health
 problems, and in health counseling. Classroom
 work and practice in community child care centers
 are offered concurrently;
- 2. The Nurse's Role in Community Child Health (8 weeks)—The focus of this course is on nursing management of common physical, psychosocial, and developmental problems of childhood with continued development of the nurse's evaluation and counseling skills. Practice in community child care settings continues. The nurse studies patterns of independent nursing practice which effect changes in health care systems.

DEGREE OR CERTIFICATE AWARDED:

Certificate stating they have satisfactorily completed the program.

ENTRANCE REQUIREMENTS:

Graduation from a National League of Nurses accredited baccalaureate program, employment in a setting concerned with health of children and their families in the community, and availability for the entire educational program.

PROGRAM TITLE:

School Nurse Practitioner Program

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The one-year program is conducted in two phases. The first phase is conducted at the University of Colorado Medical Center in Denver, where each nurse receives approximately four months of intensive theory and practice in child care and school health. This phase is a clinically-oriented educational program and includes evaluation and management of the well child, identification of various school health problems including care of emergency situations. The second phase of the program extends over an eight month period during which time the nurse applies her newly-acquired knowledge and skill under supervision in the public school setting.

DEGREE OR CERTIFICATE AWARDED:

Certificate

ENTRANCE REQUIREMENTS:

B.S. in nursing and R.N.; two letters of personal reference and two letters of professional reference; a cooperating school system which has made formal agreement to employ the nurse following this experience; plans to have available medical backup when she returns to the school; completion of application; availability for telephone or personal interview. Priority will be given to school nurses who are from school districts which will assume a significant portion of the economic responsibility for the nurse's education.

Pediatric Nurse Practitioner

STAGE OF DEVELOPMENT:

Operational since October 1969

CURRICULUM:

A one year on-the-job educational and training program with two main objectives:

Prepare the trainee to assume an expanded role in an ambulatory setting.

2. Assessment of content for curriculum construction of new advanced nursing program in the Yale University School of Nursing.

The program is loosely structured and consists of didactic instruction in historytaking, interviewing, and physical examination. The trainees work in the O.P.D. as part of the medical team and gradually accept increasing responsibility for a panel of

patients which they follow.

CERTIFICATION:

None

ENTRANCE REQUIREMENTS:

B.S. degree

This project is to be phased out in October 1971.

A second program leading to a Master's degree at the Yale School of Nursing, of which the aforementioned program is part, began in the fall of 1970. Additional formal training include regularly scheduled courses at the School of Medicine and Public Health, research seminars and a thesis is required. Nurses are expected to follow either an "ambulatory" tract or "inpatient" tract. They will be designated clinical nurse specialists on graduation. Program is similar to the now extant programs in obstetrics and midwivery and psychiatry at the Yale University School of Nursing.

PROGRAM TITLE:

Family Nursing Program

STAGE OF DEVELOPMENT:

Developmental

CURRICULUM:

This is a full-time one year demonstration program which is service oriented. It is designed to prepare nurses to assume an extended role in the provision of primary family health services, including increased responsibility for: 1. assessment (diagnosis) of the health status of the family and its members in relation to ecological factors; 2. initiation of selective preventive measures; 3. management of health and health related problems indigenous to the area, using mutually (nursing and medical) agreed upon diagnostic and treatment measures; and 4. provision of emergency services in the absence of the physician. This includes consultation with and referral to other members of the health team. The program is offered in an ambulatory care setting with outpost nursing and inpatient care facilities for provision of comprehensive, primary family health services.

CURRICULUM: (Cont'd)

The first trimester focuses on diagnosis and management of common health problems of the individual and his family; the second trimester on parental and child care, focusing in prenatal, postnatal care, the child under six, and family planning; the third trimester offers an option of Outpost Family Nursing or Advanced Nurse-Midwifery. Approximately one-third of the time is devoted to mastering theory.

DEGREE OR CERTIFICATE AWARDED:

Certificate

ENTRANCE REQUIREMENTS:

Completion of basic program in nursing with a license to practice as a registered nurse, and a minimum of six months, preferably twelve months, of generalized staff experience. Prospective students are asked to join the staff one to two months prior to admission for orientation to the service.

NUMBER OF STUDENTS ENROLLED:

Seven experimental students; nine nurse-midwifery students.

PROGRAM TITLE:

Pediatric Nurse Practitioner

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The program is eight months in duration and begins each September. It is divided into two periods of four months each, the first being a didactic period and the second being a period of precepteeship. The course is designed to prepare qualified nurses with the skills to provide primary ambulatory pediatric care within the scope of nursing practice. The instruction is based at the St. Louis Children's Hospital and the Division of Health Care Research of Washington University School of Medicine. Faculty is derived from the staff of the St. Louis Children's Hospital, particularly by those whose interests include ambulatory care.

The didactic period includes lectures, conferences and demonstrations stressing the techniques of history taking and physical examinations. Emphasis is also placed on growth and development and common pediatric problems. The major goals of the program are to provide the trainees with the appropriate skills in disease recognition, family counseling and education in several areas of ambulatory pediatrics including routine well baby and well child care, parent counseling in the matters of child rearing including anticipatory guidance.

The second four-month period includes clinical experience in the offices of private pediatricians, as well as the Out Patient Department of the St. Louis Children's Hospital and the Well Baby Clinics of St. Louis County.

A fuller description of the program is available for distribution on request.

76

Washington University, School of Medicine Division of Health Care Research and the Edward Mallinckrodt Department of Pediatrics

DEGREE OR CERTIFICATE AWARDED:

A Pediatric Nurse Practitioner certificate is awarded upon completion of the program.

ENTRANCE REQUIREMENTS:

Applicants must be registered nurses, licensed in the state of Missouri. A B.S. degree in nursing from an accredited program is preferred but not required. Experience in pediatric nursing is desirable. A personal interview is recommended. Selection will be based on the candidate's experience, academic achievement, and willingness to adapt to new situations and to assume new responsibilities.

Bronx, New York 10461

PROGRAM TITLE:

The Nurse Physician Surrogate

STAGE OF DEVELOPMENT:

Operational, pending funds for continuation

CURRICULUM:

The program consists of formal didactic lectures given by physicians, physician surrogates, social workers, and hospital administrative personnel, and on-the-job training. Students are taught the fundamentals of history and physical examination, relevant sociology, physiology and pharmacology. The trainee is trained to detect changes in the clinical status of patients, to be certain that patients comply with therapeutic regimens, and to act as the patient's medical advocate making certain that once the physician is made aware of "a change," appropriate action is taken. She renews prescriptions, and changes medication within limits.

On-the-job training in association with a physician continues and reinforces the principles outlined in the didactic lectures. Ultimately each student is capable of functioning as a surrogate follow-up physician.

> As this publication was being printed, the curriculum was undergoing revision. The following is a summary of the original curriculum which is being modified.

The course of instruction was of four months duration. During the first month there was lectures and discussion periods five mornings a week. Afternoons were devoted to study and clinical projects and patient contact. During the second, third and fourth months, three mornings were occupied with lectures and discussion periods and two mornings were spent doing precepted clinical work in the clinic or private office. During the year following the four months of formal training, the pediatric nurse practitioner is required to return to the training center one day monthly for formal continuing education.

A certificate of completion is planned to be awarded to all who have completed the training.

- 1. Licensure as a registered professional nurse.
- Knowledge of child development as demonstrated by one of the following:
 - Satisfactory completion of a course in child development within three years at a college or university.
 - Presently taking a course in child development at a college or university.
 - Satisfactory results on an examination selected by the Reivew Committee covering the subject matter.

Memphis and Shelby County Health Department

Jackie J. Cox, B.S., M.D.
Resident in Public Health
Maternal and Child Health Program
Memphis and Shelby County Health Department

Pediatric Nurse Clinician

Completed first phase of training in June 1970.

The program is designed to give an aggressive inservice training program to diploma nurses or degree nurses who will function in an expanded role in child care under the close working relationship and supervision of a pediatrician.

The length of the program is 16 weeks. Each of these weeks is comprised of two informal lecture-discussion sessions by a practicing specialist who is on the faculty of the University of Tennessee College of Medicine. Each session is from 1 to 2 hours in length. There are also two preceptor type training sessions each week of from 2 to 4 hours in a clinical setting, with the physician to nurse ratio 1 to 1, or, 1 to 2.

1. Specialists in varied fields discuss, in an informal setting, in a 1 to 4 or 8 relationship, problems related to that field; answer questions and conduct an in-depth discussion. Each session lasts from 1-1/2 to 2 hours. Materials are given for study and review at home as well as during training hours.

Memphis and Shelby County Health Department Pediatric Nurse Clinician

Climical experience. The climical teaching experience is composed of two sessions per week of 2 to 4 hours with physician to nurse ratio as 1 to 2. This is a preceptor type training, seeing patients together as they come into the clinic with complete discussion of all entities seen, methods of handling, treatments to be given and follow-up. settings there is great opportunity to pursue in-depth the weaknesses which are found in the individual nurse's knowledge. The emphasis is on nurmality and variations from normal with heavy emphasis on entities to be recognized but not to be treated. During the remainder of the week the nurse functions in the capacity of a health department nurse.

CERTIFICATION OR DEGREE AWARDED:

A certificate from the Memphis and Shelby County Health Department stating that the nurse has completed the 16-week program in a satisfactory manner.

ENTRANCE REQUIREMENTS:

Either diploma or degree nurse, with at least six months' experience in a large metropolitan health department.

NUMBER OF STUDENTS GRADUATED:

Eye Institute

Department of Ophthalmology Baylor College of Medicine

Texas Medical Center Houston, Texas 77025

PROGRAM DIRECTOR:

Louis J. Girard, M.D.

Chairman, Ophthalmic Training Programs

PROGRAM TITLE:

Ophthalmic Nursing Course

STAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The course is six weeks in duration. first week is devoted to lectures in the basic sciences. The second and third weeks will consist of didactic teaching in surgical techniques, operating room techniques, and care and maintenance of ophthalmic surgical instruments. Instruction is also given in management of the eye patient in the ophthalmologist's office, use of the lensometer, perimetry, tonometry, simple basic refractions, and muscle imbalances. Clinical experience will be provided in the various eye departments of the affiliated hospitals. During the fourth, fifth and sixth weeks the student may choose special instruction in certain subjects such as ophthalmic surgical techniques, strabisms, clinical photography, tonography, or care of the contact lens patient. The program consists of 90 hours of doctor's lectures, nursing discussions and demonstrations, and 150 hours of planned experience in the courses described.

DEGREE OR CERTIFICATE AWARDED:

A Certificate of Proficiency is granted from Baylor College of Medicine.

ENTRANCE REQUIREMENTS:

Applicants should be registered nurses already engaged in ophthalmic work or those who desire to prepare for this type of work.

ENOGRAM DIRECTOR:

Howard H. Johnson, Colonel, USAF, MC Chairman, Department of Pediatrics Wilford Hall USAF Medical Center

INOGRAM TITLE:

Pediatric Nurse Practitioner

TAGE OF DEVELOPMENT:

Operational

CURRICULUM:

The program consists of a series of lectures and demonstrations and supervised experience in the outpatient clinic, the newborn nursery and to a limited extent the inpatient service. Regular departmental conferences will be attended when applicable to the nurses training. The program covers six months.

Major emphasis will be on practical clinical sessions involving the examination of well children and those with minor illnesses under the close supervision of a pediatrician. Training in the use of visual and auditory screening tests as well as developmental screening tests will be given.

Purpose is to train selected Air Force nurses to act as pediatric associates in carrying out well-child care, screening tests, counseling services and identification and management of minor illnesses.

DEGREE OR CERTIFICATE AWARDED:

Certificate of Course Completion.

ENTRANCE REQUIREMENTS:

Registered nurse on active duty with US Air Force in Regular or Career Reserve Status. Degree preferred, but not mandatory. Minimum of two years active duty with at least one year in pediatrics.

PROGRAM DIRECTOR:

Robert E. Merrill, M.D. Professor of Pediatrics Department of Pediatrics

PROGRAM TITLE:

Nurse Clinician Training

STAGE OF DEVELOPMENT:

Operational, First course completed.

CURRICULUM:

The object of this program is to train registered nurses to adequately complete general history taking and recording plus general physical examination with a view toward detecting abnormality in contradistinction to normality; where abnormality is found, to insure physician attention on an emergency or elective basis, as may be appropriate. In addition, they are trained to provide complete well baby care independently and to independently provide advice and therapy for minor pediatric problems.

The course lasts sixteen weeks and consists of nine seminars and nine two-to-three hour practical exercises each week. The time spent in supervised activity each week is approximately thirty-three hours, minimum.

DEGREE OR CERTIFICATE AWARDED:

Certificate as Nurse Clinician

ENTRANCE REQUIREMENTS:

Applicant must be a registered nurse, preferably with at least two or three years of practical experience.

NUMBER OF STUDENTS ENROLLED:
